

Nominal Case: $\phi < 90 + \theta$

${}^{\mathcal{N}}\hat{\mathbf{r}}_{S/B} \parallel {}^{\mathcal{N}}\hat{\mathbf{t}}_{\text{ref}}$ Edge Case:
 $\phi = 90^\circ + \theta$

Perfect Compliance Cases ($\hat{\mathbf{a}} \perp \hat{\mathbf{r}}_{S/B} \rightarrow \phi = 90^\circ$)

Case 1: ${}^{\mathcal{B}}\hat{\mathbf{a}} \perp {}^{\mathcal{B}}\hat{\mathbf{t}}$

Case 2: ${}^{\mathcal{N}}\hat{\mathbf{r}}_{S/B} \perp {}^{\mathcal{N}}\hat{\mathbf{t}}_{\text{ref}}$
